

# EMPOWERED LEARNING WITH PERSONAL DEVICES

## New Joiners 2025–2026

As we continue to embrace the exciting possibilities of digital learning, we're thrilled to provide your daughter with her very own **personal learning device (PLD)** for use every day in the Senior School.

Each student will be equipped with a cutting-edge Microsoft Surface device, provided through our dedicated educational partner, **Infaserv**, with the cost being added to the school fees. This device will be an essential tool in enhancing your daughter's learning experience, enabling seamless engagement with the rich, digital aspects of her educational journey at Queen's Gate. Please review the **device options, extended insurance, and hardware specifications** on the following page and select your preference by following the provided hyperlink:

[\*\*Click Here\*\*](#)

Our order for these devices will be placed through our **IT Department**, ensuring that your daughter's device will be delivered directly to the school, set up by our expert IT team, and ready for the **first day of term in September**. Each Surface device comes with a **one-year limited hardware warranty**, a responsive **Microsoft pen/stylus**, a **Microsoft keyboard** (to transform it into a laptop), and a robust case to keep it protected - all included as standard.

For added peace of mind, we strongly recommend Microsoft's optional three-year **Extended Hardware Service & Accidental Damage Protection** insurance, which can be added to your term fee if you choose to opt-in as plans must be purchased within 45 days of device procurement.

To ensure your daughter gets the most out of her new device, we'll be providing an **induction tutorial** to guide her through its features and functions. Our friendly and knowledgeable IT support team will always be on hand to assist with any queries or concerns, and our dedicated email support line will make reporting repairs or insurance claims a breeze.

Queen's Gate will also manage the **Microsoft 365 licence** for each device, ensuring that every application needed for teaching and learning is securely deployed. The device will be enrolled in **Microsoft Intune**, offering top-notch security and protecting our school's network infrastructure, while also providing a secure environment for your daughter's learning journey.

We understand the importance of safe and responsible technology use. That's why students will sign a **Digital Code of Conduct** and follow an updated **Acceptable Use Policy** at the start of each academic year. We'll be monitoring online access to ensure a safe learning environment, while teachers remain in control of device use during lessons. We're confident that this approach, combined with our blended learning philosophy, will inspire and support your daughter's educational journey.

If you have any questions about these devices, please reach out to our **IT support team**:
